	Priority 1

Section	**Page**	**Figure Table**

Category Name System-level   **Actionee**   HAIS

Sub Category Scheduling

Subject   Release A Resource scheduling.

Description of Problem or Suggestion:

The approach to resource scheduling in Release A is not clear.

Originator's Recommendation

Clarify by the PDR wrap-up how resource scheduling will be done for Release A - what this function includes, what interactions with SDPS will be involved, how this function will be implemented.

GSFC Response by: **GSFC Response Date**

HAIS Response by: Forman   **HAIS Schedule**   2/10/95

HAIS R. E.   Forman   **HAIS Response Date**   2/10/95

Resource scheduling involves providing resource availability schedules and real-time notifications of changes in the availability of resources to the SDPS Planning and Data Processing subsystems. The resource availability schedules generated by the CSMS Resource Scheduling is used as input by the SDPS Planning subsystem for the generation of candidate plans for production processing.
